Lubricating and sharpening oil SHARPEN OIL

It is a non-coloured oil, which is an indispensable complement for lubricating and manual sharpening of surgical instruments. It should be applied to ensure perfect function and fluid movement of all surgical instruments (on all hinges or all other part which are subject to movement or friction).

Must always be used during all sharpening operations. It is used to activate the abrasive properties of all stones (Arkansas, India, etc.), and to reduce the possibility of overheating the instruments during sharpening.

Bacteriostatic Anti-Corrosion Milk

CLEANLACT

Extends your surgical instrument's lifetime. A periodic use of Cleanlact prevents corrosion; it has a bacteriostatic and lubricating action on all instruments; it guarantees perfect maintenance by eliminating eventual stains, halos and browning due to sterilization, disinfection and washing with tap water. Must use periodically, diluted or concentrated (see special instructions on packaging).
